

ACC-U-SOUND Pyramidal Shaped Diffusers

Acc-U-Sound Pyramidal Diffusers are ideal for distributing sound evenly within a room. Diffusers combined with absorption panels help to achieve sound clarity in any given space. These diffusers are lightweight for easy installation. Acc-U-Sound diffusers have been tested according to ASTM-84 Tunnel Test and have a flame spread rating of less than 24 (class "A" or "I").

Construction

Pyramidal interactive diffusers are constructed of 1/8" thick rigid molded fiberglass or ABS Plastic shaped into a pyramid for maximum sound efficiency and quality. Edges have a flat flange to allow for lay-in installation at ceiling grid. Optional 2" thick internal fiberglass available on backside of diffuser.

Finishes

White gelcoat/ABS with lemon peel texture or wrapped with woven 100% polyester fabric.

Sizes (Nominal)

24" x 24" x 8.5" ABS
24" x 48" x 12.5" Fiberglass
30" x 30" x 12.5" Fiberglass
48" x 48" x 12.5" Fiberglass

8.5" or 12.5" Deep
